EXPERIENCE

FunctionUp, Backend Developer Trainee

july 2022- PRESENT

- Proficient in Javascript.

- Trained in Backend Development using Nodejs with Express and MongoDB.

- Familiar with caching fundamentals and redis.

- Familiar with AWS S3.

PROJECTS

- **Ecommerce and Cart Management |Github Link**
  Role: Backend Developer
  Tech Stack: Javascript, Node, Express, MongoDB, jwt, mongoose, aws S3, bcrypt.
  Created a complete eCommerce webApp Backend. It is like a basic version of flipkart, amazon. Where users can add products to cart, place their orders.

- **UrlShotner |Github Link**
- Role: Backend Developer
  Tech Stack: Javascript, Node, Express, MongoDB, Redis.
  Converts long url to short url like bit.ly. Used Redis as a caching solution for reducing response time.

- **Book Management | Github Link**
- Role: Backend Developer
  Tech Stack: Javascript, Node, Express, MongoDB, jwt.
  Backend of book Management webApp where users can list and manage books. Other users can post review on them.

- **Blogger WebApp | Github Link**
- Role: Backend Developer
  Tech Stack: Javascript, Node, Express, MongoDB, jwt.
  It is like a normal blogger webApp where authors can publish their posts secured by authorisation. Other users can see all the available posts on our blogger.

- **Apply internship |Github Link**
- Role: Backend Developer
  Tech Stack: Javascript, Node, Express, MongoDB, Redis.
  Created Backend for an "**Apply Internship**" websites, with multiple API for Intern to perform CRUDoperations.
